[1:13] 1 - Registro de usuarios Emisor y Receptor

[2:32] 2 - Registro del usuario Receptor

[3:56] 3 - Login del usuario Emisor

[4:76] 4 - Transferencia del Emisor al Receptor

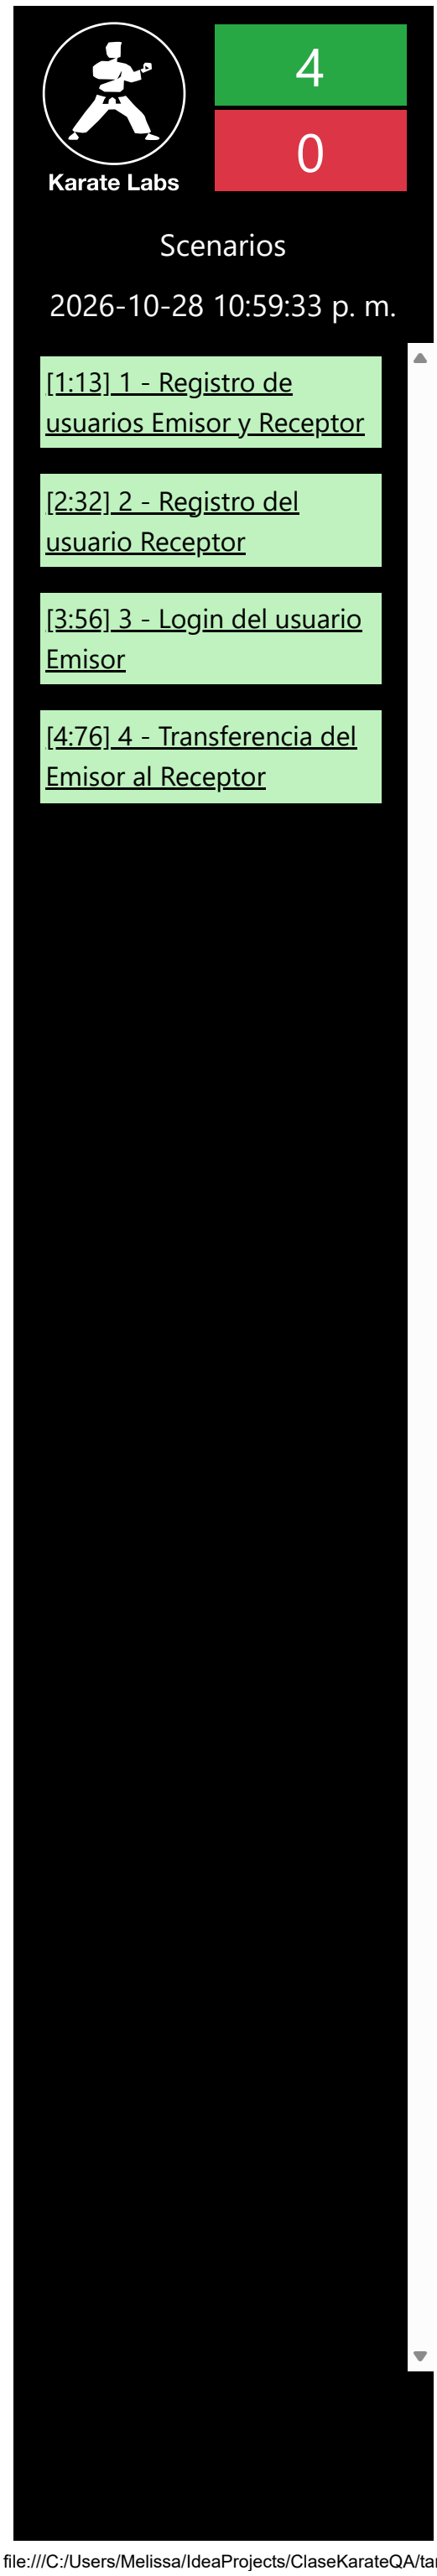

Summary | Tags | Feature: ***banco/regresion/regresion.feature*** | **Examen practico - Regresion bancaria**

Scenario: [1:13] **1 - Registro de usuarios Emisor y Receptor**		ms: 942
>>	Background:	
14	* def celularEmisor = generarCelular()	41
15	* def correoEmisor = 'emisor' + celularEmisor + '@example.com'	2
17	Given path 'auth', 'v1', 'register'	8
18	And request	3
27	When method post	772
28	Then status 201	6
29	* print 'Registro Emisor:', response	5

Scenario: [2:32] **2 - Registro del usuario Receptor**		ms: 288
>>	Background:	
33	* def celularReceptor = generarCelular()	3
34	* def correoReceptor = 'receptor' + celularReceptor + '@example.com'	2
36	Given path 'auth', 'v1', 'register'	1
37	And request	2
46	When method post	246
47	Then status 201	0
48	And match response.message == 'Usuario creado exitosamente'	22
49	And match response.user.id == '#string'	2
50	* def idReceptor = response.user.id	2
51	* print 'Registro Receptor:', response	2

Scenario: [3:56] **3 - Login del usuario Emisor**		ms: 231
>>	Background:	
57	* def celularLogin = '975278627'	1
58	* def pinLogin = '123456'	1
60	Given path 'auth', 'v1', 'login'	1
61	And request	2
68	When method post	219
69	Then status 200	0
70	And match response == '#object'	2
71	* print 'Respuesta Login Emisor:', response	3

Scenario: [4:76] **4 - Transferencia del Emisor al Receptor**		ms: 790
>>	Background:	
	# Registrar un receptor nuevo	
79	* def celularReceptor = generarCelular()	2
80	* def correoReceptor = 'receptor' + celularReceptor + '@example.com'	1
82	Given url 'http://134.209.211.10:4001/auth/v1/register'	1
83	And header x-channel = 'WEB'	1
84	And header Content-Type = 'application/json'	1
85	And request	1
94	When method post	229
95	Then status 201	0
96	* def idReceptor = response.user.id	1
	# Login del emisor	
99	* def celularLogin = '975278627'	1
100	* def pinLogin = '123456'	1
102	Given url 'http://134.209.211.10:4001/auth/v1/login'	1
103	And header x-channel = 'WEB'	0
104	And header Content-Type = 'application/json'	0
105	And request	1
112	When method post	218

113	Then status 200	0
114	* def tokenEmisor = response.token	1
	# Transferencia al receptor	
117	Given url 'http://134.209.211.10:4003/transaction/v1/transfer'	1
118	And header x-channel = 'WEB'	0
119	And header Content-Type = 'application/json'	0
120	And header Authorization = 'Bearer ' + tokenEmisor	2
121	And request	1
130	When method post	320
131	Then status 200	0
132	And match response.status == 'COMPLETED'	2
133	* print 'Resultado Transferencia:', response	3
